

Waste management tailored to industry and government requirements

Indaver offers high-quality, sustainable and cost-efficient total waste management solutions for industrial companies and public authorities. For each type of waste we offer a tailored solution thanks to our wide range of inhouse facilities and processing possibilities with third parties. Sustainability, cost efficiency and the assumption of all tasks on the customer's behalf are central to the services we provide. Thanks to our extensive experience and know-how, customers can always rely on their waste being managed correctly and transparently. Indaver is an international player, with commercial activities and processing facilities for hazardous and non-hazardous waste throughout Europe.

News

08-07-2010

At the beginning of the Belgian EU Presidency, CEWEP (Confederation of European Waste-to-Energy Plants) is proud to announce that Belgian Waste-to-Energy (BW2E) becomes a member of CEWEP from 1st July 2010.

Indaver, member of DELTA

The multi-utility company

With a 75% stake, [DELTA nv](#) is Indaver's largest shareholder. The Dutch business is a multi-utility company, with a wide range of services and products, from electricity, gas and water to the Internet and digital telephony, from solar panels to water purification and waste processing. Thanks to DELTA's support, we have every opportunity to develop and reach the forefront of the European environmental sector.
